

Write simple Android program for Android Activity Life Cycle.

MainActivity.java

```
package com.technoboy.androidactivitylifecycle;

import androidx.appcompat.app.AppCompatActivity;
import android.os.Bundle;
import android.util.Log;

public class MainActivity extends AppCompatActivity {

    //CSRPSRD
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        Log.i("Life Cycle","onCreate Method Called");
    }
    @Override
    protected void onStart() {
        super.onStart();
        Log.i("Life Cycle","onStart Method Called");
    }
    @Override
    protected void onResume() {
        super.onResume();
        Log.i("Life Cycle","onResume Method Called");
    }
    @Override
    protected void onPause() {
        super.onPause();
        Log.i("Life Cycle","onPause Method Called");
    }
    @Override
    protected void onStop() {
        super.onStop();
        Log.i("Life Cycle","onStop Method Called");
    }
    @Override
    protected void onRestart() {
        super.onRestart();
        Log.i("Life Cycle","onRestart Method Called");
    }
    @Override
    protected void onDestroy() {
        super.onDestroy();
        Log.i("Life Cycle","onDestroy Method Called");
    }
}
```

UNVIERSITY OF MUMBAI Practical Examination – November 2018 M.C.A Semester – V (CHOICE BASED) LABORATORY MCA L501 Mobile Application and User Experience Design Lab

Write a simple Android program for Activity overloading

activit_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:orientation="vertical"
    tools:context=".MainActivity">

    <TextView
        android:text="@string/name"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"/>

    <EditText
        android:id="@+id/edittext1"
        android:layout_width="214dp"
        android:layout_height="wrap_content"/>

    <Button
        android:id="@+id/btn1"
        android:layout_width="106dp"
        android:layout_height="wrap_content"
        android:text="@string/ok"/>

    <Button
        android:id="@+id/btn2"
        android:layout_width="106dp"
        android:layout_height="wrap_content"
        android:text="@string/cancel"/>

</LinearLayout>
```

ActivityMain.java

```
package com.technoboy.activityoverloading;

import androidx.appcompat.app.AppCompatActivity;

import android.os.Bundle;
import android.view.KeyEvent;
import android.view.View;
import android.widget.Button;

Write an android program to check internet connection.

AndroidManifest.xml

```
<uses-permission android:name="android.permission.ACCESS_NETWORK_STATE" />
<uses-permission android:name="android.permission.INTERNET" />
```

Activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.constraintlayout.widget.ConstraintLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <Button
        android:id="@+id/check"
        android:text="@string/check"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"/>

</androidx.constraintlayout.widget.ConstraintLayout>
```

MainActivity.java

```
package com.technoboy.checkinternet;

import androidx.appcompat.app.AppCompatActivity;

import android.net.ConnectivityManager;
import android.net.Network;
import android.net.NetworkInfo;
import android.os.Bundle;
import android.telephony.AvailableNetworkInfo;
import android.view.View;
import android.widget.Button;
import android.widget.Toast;

public class MainActivity extends AppCompatActivity {

    Button button;
    checkConnection cn;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        button=findViewById(R.id.check);
        cn=new checkConnection(this);

        button.setOnClickListener(
```
